

Teva's Quality Commitment

At Teva, we are all in for better health.

Quality is fundamental to our millions of patients, as they rely on us to deliver medicines of consistent high quality and safety, whenever they need them.

Quality is embedded in everything we do, across the entire product lifecycle, and owned at every level of the organization. It is reflected in how we think, decide, and act every day.

As we advance our Pivot to Growth strategy, we operate one **integrated, modern Quality system**. **It connects people**, processes, and digital capabilities to enable reliable research, development, supply, distribution and commercialization of our products, driving world-class performance, delivered by highly capable and motivated employees.

We take a proactive approach, anticipate risk, and continuously improve how we work. **We act with ownership and integrity**, use data and state-of-the-art technology to make better decisions, and stay focused on what matters most.

We hold ourselves to a **high standard of execution and excellence**. **This is how we run the business**. It underpins trust with patients and partners, supports performance, and enables long term growth.
